

### ABOUT ME

I am a front-end software developer specializing in React frameworks like Next.js, building responsive, user-centric web applications with a focus on performance and seamless design. My expertise in these frameworks allows me to craft powerful, scalable solutions while leveraging tools like Tailwind CSS to create polished user interfaces. Beyond my front-end skills, I have a working knowledge of full-stack technologies, including Node.js, Express, and MongoDB, which gives me a bit of knowledge in the MERN stack. I also have experience with Firebase, website and app development, and SEO, enabling me to contribute to all stages of the development lifecycle and create meaningful, impactful digital experiences.

### PROFESSIONAL EXPERIENCE

#### **Client Projects | Full-Stack E-Commerce Platforms | SPE Media ([spemedia.co.zw](http://spemedia.co.zw)) | November 2025 – January 2026**

- Designed and built full-stack e-commerce platforms for client businesses, including a sports equipment store ([proactionsports.co.zm](http://proactionsports.co.zm)) and a property sales platform ([hogardoradohouse.com](http://hogardoradohouse.com)).
- Developed scalable, type-safe frontends using React + TypeScript with reusable component-based architecture.
- Implemented dynamic product and listing management using Google Sheets as a lightweight backend, automated through Google Apps Script.
- Wrote custom JavaScript scripts to programmatically generate HTML pages for products and listings, improving content scalability and maintenance.
- Automated page creation and updates via scripts to reduce manual work and speed up content changes.
- Integrated WhatsApp API and external Google APIs/scripts to enable customer inquiries, lead generation, and sales workflows.
- Optimized performance and responsiveness across devices, ensuring fast load times and a smooth user experience.
- Deployed and maintained production-ready applications under SPE Media, hosted on Hostinger (hPanel) and cPanel, with ongoing updates and support.

#### **App and Web Developer Intern | SpeMedia | June 2025 – September 2025**

- Developed and deployed multiple client-facing websites from concept to completion, including [George Mose](#), [Springwaters](#), and [Design Culture](#).
- Played a key role in developing confidential web applications, focusing on building intuitive user interfaces and ensuring cross-browser compatibility.
- Actively participated in team meetings and code reviews, incorporating feedback to improve code quality and adhere to company-wide development standards.
- Worked closely with the design team to implement pixel-perfect UIs and enhance the overall user experience across all projects.

## **App and Web Developer Intern | SpeMedia | June 2025 – September 2025**

- Developed and deployed multiple client-facing websites from concept to completion, including George Mose, Springwaters, and Design Culture.
- Played a key role in developing confidential web applications, focusing on building intuitive user interfaces and ensuring cross-browser compatibility.
- Actively participated in team meetings and code reviews, incorporating feedback to improve code quality and adhere to company-wide development standards.
- Worked closely with the design team to implement pixel-perfect UIs and enhance the overall user experience across all projects.

## **Wed Development Student | Uncommon.org | July 2024 – July 2025**

- Developed responsive web applications that boosted user engagement.
- Worked closely with team members to complete projects efficiently and on time.
- Took part in performance reviews to help the team improve and keep quality standards high.

## **Youth Coding Volunteer | Uncommon.org | 2024 – Present**

- Teach Scratch programming to school kids every weekday.
- Create lesson plans and guide students to build their coding skills.
- Run workshops to get students excited about tech and creative thinking.

### **EDUCATION**

#### **Emganwini High School | 2020-2023**

ZIMSEC – 8 subjects including :

- Maths
- Physics
- Chemistry
- Biology

### **SKILLS**

- Node.js
- Express
- Firebase
- App development
- Website development
- React frameworks
- Mongo DB
- SEO
- React

---

### **CERTIFICATES**

#### **Front End Development Libraries | 2025**

[FreeCodeCamp](#)

#### **JavaScript Algorithms and Data Structures | 2024**

[FreeCodeCmp](#)

#### **Responsive Web Design | 2025**

[FreeCodeCamp](#)

#### **Back End Development and APIs | 2025**
