Lyle B Chadya

Software Developer

ABOUT ME

I am a front-end software developer specializing in React frameworks like Next.js, building responsive, user-centric web applications with a focus on performance and seamless design. My expertise in these frameworks allows me to craft powerful, scalable solutions while leveraging tools like Tailwind CSS to create polished user interfaces. Beyond my front-end skills, I have a working knowledge of full-stack technologies, including Node.js, Express, and MongoDB, which gives me a bit of knowledge in the MERN stack. I also have experience with Firebase, website and app development, and SEO, enabling me to contribute to all stages of the development lifecycle and create meaningful, impactful digital experiences.

PROFESSIONAL EXPERIENCE

App and Web Developer Intern | SpeMedia | June 2025 – September 2025

- Developed and deployed multiple client-facing websites from concept to completion, including George Mose, Springwaters, and Design Culture.
- Played a key role in developing confidential web applications, focusing on building intuitive user interfaces and ensuring cross-browser compatibility.
- Actively participated in team meetings and code reviews, incorporating feedback to improve code quality and adhere to company-wide development standards.
- Worked closely with the design team to implement pixel-perfect UIs and enhance the overall user experience across all projects.

Wed Development Student | Uncommon.org | July 2024 – July 2025

- Developed responsive web applications that boosted user engagement.
- Worked closely with team members to complete projects efficiently and on time.
- Took part in performance reviews to help the team improve and keep quality standards high.

Youth Coding Volunteer | Uncommon.org | 2024 – Present

- Teach Scratch programming to school kids every weekday.
- Create lesson plans and guide students to build their coding skills.
- Run workshops to get students excited about tech and creative thinking.

Tech Connect | Full-Stack Web Application | Uncommon.org | 2025 – Present

- Built a responsive full-stack web platform enabling user authentication and data management using Firebase Authentication and Cloud Firestore.
- Utilized Next.js for SSR/CSR efficiency and Styled Components for dynamic, scalable component-based styling.
- Deployed via Vercel with CI/CD integration for seamless updates and production-ready delivery.

EDUCATION

Emganwini High School | 2020-2023

ZIMSEC – 8 subjects including :

- Maths
- Physics
- Chemistry
- Biology

SKILLS

- Node.js
- Express
- Firebase
- App development
- Website development
- React frameworks
- Mongo DB
- SEO
- React

CERTIFICATES

Front End Development Libraries | 2025
FreeCodeCamp

JavaScript Algorithms and Data Structures | 2024
FreeCodeCmp

Responsive Web Design | 2025
FreeCodeCamp

Back End Development and APIs | 2025
FreeCodeCamp
